

# Job Description:

At Industrial Plankton, we're on a mission to revolutionize global food security and combat climate change through innovation. We're a manufacturing company with a healthy dose of R&D. We are a dynamic group that loves to innovate, build, and support our global customers in aquaculture, biotech and research. We have recently moved to our brand new location, and are now located in Langford, BC.

The successful candidate will help with the design and manufacturing of the Industrial Plankton product line of bioreactors for aquaculture. Duties include machining, assembly of industrial controls, plastic fabrication, sensor calibration, and quality assurance.

Please see our company website for details about our products:

## A successful candidate must:

- Be familiar with power tools and fabrication
- Bring an exceptional work ethic that drives you to excel in every task
- Embrace ownership of your work, ensuring top-quality results
- Follow written and verbal instructions with precision and clarity
- Maintain an organized and clean workspace, ensuring efficiency and safety
- Enjoy the freedom of working independently, without direct supervision
- Be physically capable of repeatedly lifting large weight (50 lbs)

## Assets to have are:

- Hands-on experience with a variety of hand tools and power tools
- Machining & wood working experience
- Knowledge in electrical wiring & troubleshooting
- Exposure to aquaculture and cell biology
- Experience in a fast paced, deliverable based environment

Join us to be a part of a team that is pushing boundaries and driving innovation!
